

## KING KMS® Modular Sign System

The most versatile architectural modular sign system on the market today, the KING KMS can be designed to visually reinforce any design strategy. Consisting of a wide range of dovetailed interlocking aluminum profiles, KING KMS is the most sophisticated product of its type. Designers and architects are limited only by their imagination when turning their vision into a KMS signage solution. Elegant and informative cohesive signage programs can be developed in a matter of minutes.
