SIGNAGE INNOVATION

KING Architectural Products has set the standard in the architectural signage industry for over 60 years. From traditional signage and wayfinding directories to interactive touch screen displays, KING has maintained a stellar reputation with continuous R&D, innovative design, technology integration and an unwavering commitment to producing high quality products that are elegant, functional and enduring. KING has worked with leading architects and designers over the past 60 years to perfect both custom and modular signage for interior and exterior spaces. The result of these efforts has allowed KING to achieve and promote functional and harmonious signage at a world class level.

KING
Architectural Products

KING KMS | MODULAR SIGN SYSTEM

The most versatile architectural modular sign system on the market, KING KMS can be designed to visually reinforce any design strategy. Consisting of a wide range of dovetailed interlocking aluminum profiles, KING KMS is the most sophisticated product of its type available today. Designers and architects are limited only by their imagination when turning their vision into a KMS signage solution. Elegant and informative cohesive signage programs can be developed in a matter of minutes.

FEATURES:

- A wide range of profiles, typefaces and colors
- Concealed fasteners
- Frameless
- Single sided or double sided signs
- Wall mount, ceiling suspended or projecting
- ADA compliant
- Durable aluminum components

KING GDS | GRAYLIGHT DISPLAY SYSTEM

KING GDS is an internally illuminated directory and wayfinding solution that provides a changeable message system for retail, office and other building complexes.

KING GDS is designed to enhance any interior environment and engineered for durability and functionality. The high output fluorescent lighting, internal ventilation and a concealed hinge and locking mechanism combine to make GDS extremely suitable for areas with high ambient light levels, such as office lobbies and retail malls.

FEATURES:

- Quick and easy updating
- Tongue and groove interlocking strips eliminate light leaks and facilitate installation of new tenant strips
- Meticulous design and manufacturing
- Gas-assist service arms support face panel of top hinged units for convenient maintenance
- 3/16" extruded aluminum casing
- 1/4" perimeter clearance for fully recessed installations
- Hinged carrier panel facilitates maintenance of electrical components

KING FSS | FREESTANDING SIGN SYSTEM

KING FSS is an elegant, flexible and versatile information display system. The simple, yet striking design focuses attention on the message, not the structure. An extruded anodized aluminum base captures two tempered glass panels, in which the display medium is sandwiched.

APPLICATIONS

- Event/exhibit material
- Advertising
- Menu board
- Brand awareness
- Poster display
- Wayfinding

FEATURES:

- Standard 13" base with 18" w x 47" H glass
- Standard 22" base with 27" w x 50" H glass
- Standard finishes in either natural or black anodized aluminum
- Custom sizes, colors and finishes available
- Single or double sided messages

KING CDS | COMPUTERIZED DIRECTORY SYSTEM

KING CDS is a touch screen based electronic directory and wayfinding solution. Hardware, software, and enclosures are all offered in a complete turnkey solution that is designed to enhance any interior design strategy. The intuitive, user-friendly software facilitates rapid updates and editing. KING CDS is a cost efficient and reliable solution to assist you in the day-to-day operations of office buildings, shopping centers, hospitals, educational institutions, courthouses, government and other facilities.

HARDWARE FEATURES

- Requires minimum supervision
- Fully network capable
- Combines state of the art electronics and touch-screen technology with superior industrial design

SOFTWARE FEATURES

- Flexible graphic user interface
- Multiple software applications
- Remote or local content management
- Customizable attract screens
- Supports multiple languages
- Client editable software

Standard screen size: 17"

KING PDS | POSTER DISPLAY SYSTEM

Highly engineered and impeccably finished, KING PDS is a uniquely designed architectural poster display system. From standard poster sizes to large custom displays, KING PDS provides exceptionally even brightness over the entire display area while preventing any distortion of the display material. Surface mounted or recessed, KING PDS is designed to visually blend into any interior design setting and bring attention to the conveyed message.

FEATURES:

- 3" deep illuminated displays
- 1" deep non-illuminated displays
- Surface mounted or fully recessed
- Natural or black anodized aluminum
- Trim options available
- Concealed hinge and locking device
- Sidelight technology

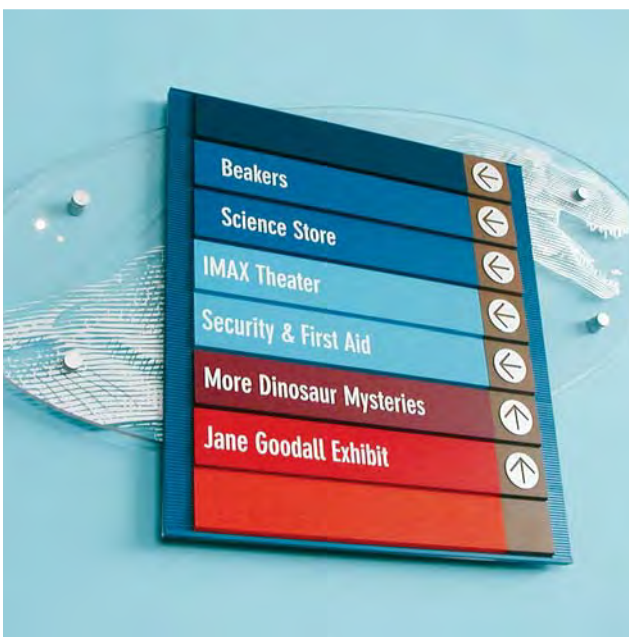

Custom formed water jet cutout sign

Cast bronze plaque - 72" diameter

Custom formed aluminum ceiling mounted sign

Custom screened acrylic plaque with KMS Directory panel

KING | CUSTOM SIGNAGE

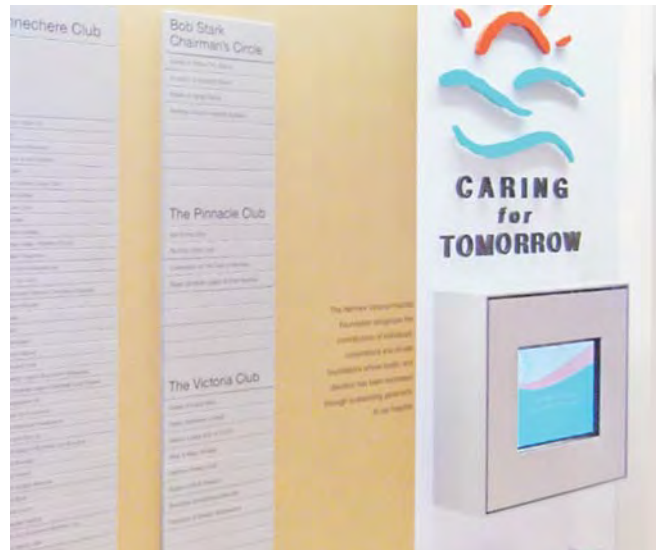

With years of success working with leading international architects and designers KING has the design and production experience to produce cutting edge custom signage programs, that meet all code requirements yet are visually attractive and architecturally stunning.

KING | DONOR RECOGNITION SOLUTIONS

KING offers an unparalleled level of experience, creativity and engineering expertise in donor recognition solutions. We seamlessly combine traditional and interactive touch screen displays to achieve visual appeal and reliable functionality. Through our dedication and experience and by incorporating new technologies we work with our clients to expand and support their success in their donor recognition programs.

GDS - Donor recognition

Illuminated Exterior custom pylon sign

Stainless steel fabricated letters

Cutout stainless steel letters on stainless steel plaque

Custom 3 dimensional stainless steel figure with backlit cutout lettering

KING | EXTERIOR SIGNAGE

With the same precision manufacturing as our interior signage, KING excels at producing custom solutions for exterior signage. KING's post and panel signage, pylon signage, and raised lettering can be used individually or as a combination of technologies to satisfy the most discerning clients. Our portfolio of successful exterior signage continues to grow with varying projects from the most prestigious commercial and public properties to extremely innovative entertainment and sports facilities.
